-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (4640725).

Jones (Figures 1-8) shows an optical fiber anchor device having a hot-melt type bonding agent 48 in the form of a tube with a hollow portion inserted in a hollow portion of a heat shrinkable tube 50, an optical fiber 26 and support rods 42, 44 inserted in the hollow portion of the hot-melt type bonding agent wherein an anchor portion is formed by heating to melt the bonding agent and shrink the heat-shrinkable tube and become integrated with the optical fiber. The bonding agent is applied on outer surface of the support rods. The support rods are held by a sleeve of a terminal connecting device 14. Concavities and convexities are formed on outer circumferential surface of the rods.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2839

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (4640725).

Jones shows all the features of these claims except the length of the device being 30-100 mm. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to make the length of the device 30-100 mm because this would require a mere selection of a size which involve only routine skill in the art.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ladany(4237474), Landis et al. (4479698), Kurosawa et al. (6647194).
